

Directional Control field set-up:

The above diagram shows the set-up for the Directional Control badge. Dogs may be asked to go to base 1, or 3. From there, they will be sent to base 4. From base 4, they may be asked to go to any of the bases.

Dogs may be asked to do an emergency stop and down at any point. They will also be asked to return to the handler (designated by the circle above) and may be re-sent to another base from there.

Bases may be designated by anything the dog can safely jump onto.
