

Treibball beginner III:

- \_\_\_ Dog can start near the handler, 25' from the balls, and get to the stationary position (behind either ball) facing the handler (no target)
- \_\_\_ Dog can push two balls directly to the handler from 25' away. Handler may not step toward the dog across the goal line, but may move laterally 5' each direction from the start position (10' wide goal, handler starts in the center) Handler needs to be able to capture the ball without leaving the designated goal area.
- \_\_\_ Handler can stop the dog if it gets over stimulated and demonstrates (if needed) an understanding of how to calm the dog before restarting but balls should get back to the handler within 7 minutes of the send away
- \_\_\_ Handler understand the rules for DSA Treibball competition
